

# Free Standing LCD Video Wall

DUAL COLUMN MODULAR DISPLAY  
FOR LCD AND PLASMA MONITORS

**Create concert quality video walls for stable attention-getting presentations from floors, stages, platforms and risers using the Adaptive LCD and Plasma video monitor frame.**

Build seamless video displays quickly and safely atop leg supports using Adaptive's load-rated modular LCD Framing System, up to 5 X 5.

Precision machined connecting bars and compression locks link multiple LCD frames together, horizontally and vertically for both landscape and portrait presentations. Very precisely dimensioned LCD frames and LCD monitors are assembled in tiers then the completed and locked assembly is supported on top of support legs (2 per column), creating a very stable free-standing framework.

## Rigging Beams in Landscape Orientation

Connect frames horizontally

Load LCD's into frames

Assemble next tier and load LCDs into frames.

Load LCD's into frames

Vertical leg support.

**Dismantling free-standing video walls is just as easy and predictable with the use of quick release aircraft locking pins.**

### Features:

- Expands horizontally and vertically up to 5x5
- Landscape or portrait orientations
- Cam-style compression locks
- Precision-machined connecting bars
- Powder-coated alloy steel welded frames
- Optional quick-release connecting pins
- Easy to assemble stabilizing leg supports

**WARNING:** Mounting and/or suspension of audio and video equipment requires experienced professionals. Improperly installed equipment can result in property damage, personal injury and/or liability to the installing contractor.
