

Interlocking LCD Video Wall

TIME SAVING MODULAR FRAME SYSTEM
FOR LCD AND PLASMA MONITORS

Build nearly seam-less video walls quickly and securely using Adaptive's modular LCD Framing System for a LCD and Plasma monitors.

Precision-machined connecting bars and compression locks link multiple LCD frames precisely together, horizontally and vertically in both landscape or portrait orientations, to create bigger than life images and presentations.

These interlocking modular frames assemble fast and easy and locked together into a wall grid. They install as one unit, up to 10x10, providing a very predictable, fast and secure

installation. These engineered frames reduce substantial labor hours, typically required to install and align multiple LCD screens, one screen at a time.

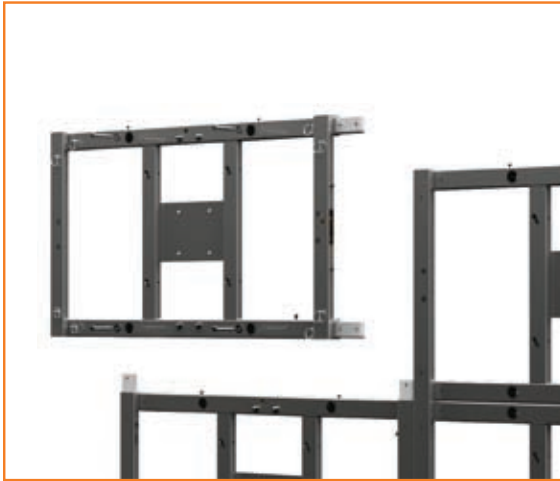

Once the frame is assembled and mounted to a structural wall, LCDs are then lowered into slotted tracks. Disassembling video walls when used for temporary installations is just as easy by way of quick release aircraft locking pins.

HoverGrid™

TIME SAVING MODULAR FRAME SYSTEM
FOR LCD AND PLASMA MONITORS

STEP
1

Assemble frames into desired configuration.

STEP
2

Install assembled frame work to a structural vertical surface.

STEP
3

Load LCDs into frames starting at bottom right.

Example of a landscaped-oriented configuration.

Example of a portrait-oriented configuration.

Features:

- Expands horizontally and vertically up to 10x10
- Framework attaches to wall as one unit for easy alignment
- Landscape or portrait orientations
- Cam-style compression locks
- Precision-machined connecting bars
- Rugged powder-coated alloy steel welded frames
- Optional quick-release connecting pins

WARNING: Mounting and/or suspension of audio and video equipment requires experienced professionals. Improperly installed equipment can result in property damage, personal injury and/or liability to the installing contractor.

ALWAYS USE SAFETY CABLES.
